

Radiant Skin Within Your Reach 1 Life • 1 Face • 1 Opportunity

Why leave your face to fate when you can take fate in your own hands? Youth is a time of freedom, a time for self-confidence to blossom. However, it can often be marred by the blossoming of unwelcomed skin problems like acne.

Acne occurs when the oil that normally lubricates the skin gets trapped in blocked oil ducts and results in what we know as pimples, blackheads and whiteheads on the surface of the skin. Acne commonly occurs in people between their teenage years and their 20s. However, it is not restricted to this age. Older adults and children can also have acne. The most popular aesthetic treatments for acne are chemical peels, fillers or a combination of both.

Chemical peel is one of the oldest cosmetic procedures in the world. It was performed in ancient Egypt, Greece and Rome to help people achieve smoother and more beautiful skin. Today, chemical peels serve the same purpose - to improve and smoothen the texture of the facial skin, to reduce or eliminate the appearance of fine lines, wrinkles, acne scarring, uneven pigmentation and to revitalize your skin.

Fillers can give your skin a plumper and smoother appearance. Sculptra® is an injectable filler containing poly-L-lactic acid that works by stimulating the production of your own facial collagen, which can reduce the appearance of post-acne scarring. Over 27,000 treatments were done in Australia since 2002. Clinical studies have shown that the results of a Sculptra® treatment can last up to 2 years.

At the Singapore Aesthetic Centre (SAC), we believe in holistic treatment for all your skin problems. We listen to your specific concerns and will customise a treatment plan that can best bring out your inner radiance. Renewing patient self-confidence through aesthetic medicine is a strong priority for Dr Yeak Hwee Lee, Medical Director of SAC, with her special interests in acne and acne scarring along with skin rejuvenation. As a practitioner of aesthetic medicine for the past eight years, Dr Yeak maintains that the effective practice of aesthetic medicine can enhance outer beauty safely while revealing inner beauty and enhancing self-confidence.

It is time to say goodbye to bad skin and embrace a new you!
